

Cirrus Logic: Excerpts from Corporate Brochure

Brilliant technology. Proven leadership.

As a recognized technology leader with worldwide scope, Cirrus Logic is a driving force for innovation with high-precision analog and mixed-signal integrated circuits (ICs). The fabless semiconductor company specializes in products for audio and industrial applications, working with more than 3,000 global customers – many of them the market leaders behind the most respected brands available today. Cirrus serves these customers with an international presence that includes offices and distributors in Europe, Japan and Asia, plus its U.S.-based corporate headquarters in Austin, Texas.

Founded in 1984, Cirrus has established a legacy of leadership through its team of forward-thinking engineering experts. The company's growing portfolio of intellectual property now includes more than 900 patents that are integral to its collection of 600+ diverse products. In fact, top OEMs (Original Equipment Manufacturers) prefer Cirrus products for consumer, automotive and professional audio applications, as well as industrial measurement. The reason? Products from Cirrus Logic feature exceptional quality that streamlines the design process while adding distinct value to a manufacturer's offerings. So when OEMs choose the breakthrough solutions from Cirrus for their designs, they select a powerful technology differentiator for a measurable competitive advantage.
